

# Transportation Planning

## Mission

DDOT shall develop and update the Intermodal State Transportation Plan, corridor management plans, and other traffic studies on a regular basis, focusing on the safe and efficient movement of people, goods, and information; conduct planning studies on the condition and quality of the District's transportation system to locate areas where future investment is required; develop alternative methods of financing transportation projects and services to achieve financial self-sufficiency; and develop and update the District's various transportation improvement plans, consistent with federal and local requirements. (DDOT Establishment Act, D.C. Code §50-921.04)
